- 4. Photos that showcasing one(s)'s personality. If you would like, you can include some object that is very personally important to the model. For instance, a lady holding lily for a lady who's passion is gardening, etc. Or... baby who's teddy bear that she/he used to treasure... Halloween time... a child dressed in a costume among pumpkins...etc.*
- 5. Interesting Composition is a plus*

**Suggestions in taking good photos for portrait:** *If you are going to take photos for the portrait painting or drawing purpose, please consider some of the criteria. When making an amazing painting, composition plays a very important role in creation. Please do not be afraid to use angles when taking pictures for this particular purpose. Often time angle becomes the key to a good composition. When creating a portrait painting, the direction of eye can affect the result greatly as well. Please do not be afraid to look away from the camera. Sometimes the best result can be achieved if a model is not looking at the camera directly. Please be creative and have fun!*
